

Leadtime Trends

The leadtime for axial wirewound resistors has reduced from 24 to 7 weeks and the leadtime for silver mica capacitors has dropped from 12 to 9 weeks. Other leadtimes across all product ranges are stable although the leadtimes for polyphenylene sulphide (PPS), and 0201-case ceramic chip and axial aluminium electrolytic capacitors remains extended. Alternative devices can be recommended to cut these leadtimes.

Metal Price Trends

The cost of copper, silver and palladium has risen. For palladium, supply levels have fallen and demand has risen as the automotive market turns to petrol-driven cars which use palladium in the catalytic converter, compared to diesel vehicles which use platinum.

Acquisitions, Last Time Buys and Product Change Notifications

Acquisitions

- Exxelia has acquired Micropen Technologies Corporation which adds high-rel resistors to its current portfolio of capacitors & magnetic products | [Read more](#)
- TT Electronics' acquisition of the Covina business unit from Excelitas Technologies Corp., enhances customer support for power electronics used in the aerospace and defence markets | [Read more](#)

Reinstated Devices

- Ohmite has reinstated availability of four variants of CSM221 series heatsinks with the device suffix 12AE, 28AE, 40AE and 30AE | [View PCN](#) [Request quote](#)

Last Time Buy (LTB)

- LTB for certain values of Vishay VJ1210Axx and VJ1808Axx hi-rel NP0 (C0G) MLCCs. LTB is 12 June 2020 with last shipment for 12 Sept 2020 | [View EOL](#) [Request quote](#)

End of Life (EOL)

- Ohmite CA-TX1-050-E and CA-TX2-050-E heatsinks are End of Life with immediate effect due to low usage | [View PCN](#) [Request Alternative](#)

Part Change Notification (PCNs)

- The WS2 part number suffix on Knowles StackiCap™ capacitors of ≥1.2kV is changing to WS3 from 1 March 2020 to match the AEC-Q200 part number | [View PCN](#)
- The terminations of Ohmite RC, RF, RM, RP and RW resistors in body sizes CA, DA, DB, and EA have been changed to thinner dimensions | [View PCN](#)
