Bulk Metal® Foil Technology Industrial Precision Resistors
with TCR of ± 4 ppm/°C and Tolerance of ± 0.01 %

**FEATURES**

- Temperature Coefficient of Resistance (TCR)*
  ± 4 ppm/°C (0°C to + 60°C)
  ± 8 ppm/°C (- 55°C to + 125°C, + 25°C Ref.)
- Resistance Range: 0.5Ω to 1MΩ (higher or lower values of resistance are available)
- Resistance Tolerance: to ± 0.01%
- Load Life Stability: to ± 0.005 % at 70°C, 2000 hours at rated power
- Electrostatic Discharge above 25,000 V
- Non Inductive, Non Capacitive Design
- Rise time: 1 ns without ringing
- Current Noise: - 40dB
- Thermal EMF: 0.05 μV/°C typical
- Voltage Coefficient: < 0.1 ppm/V
- Inductance: 0.08μH
- Matched Sets Available
- Terminal Finishes Available:
  RoHS Compliant
  Tin/Lead Alloy with minimum 5%, nominally 10% Lead content
- Any value at any tolerance available within resistance range

*For values below 50 Ω please contact our Application Engineering department

**APPLICATIONS**

- Industrial
- Medical
- Audio (high end stereo equipment)
- Test and Measurement equipment
- Precision Amplifiers

**INTRODUCTION**

Bulk Metal® Foil Technology out performs all other resistor technologies available today for applications that require high precision and high stability.

This technology has been pioneered and developed by VISHAY, and products based on this technology are the most suitable for a wide range of applications.

Generally Bulk Metal® Foil technology allows us to produce customer orientated products designed to satisfy challenging and specific technical requirements.

The VSR series of resistors is a low cost version of the well established S-Series of resistors. These resistors are made of foil elements so all of the inherent performance of foil is retained. They do not however, have the same TCR or tolerance ranges (see table I for details). These products find a wide range of usage in high end stereo equipment and some grades of test and measurement equipment.

Standoffs are dimensioned to provide a minimum lead clearance of 0.25mm between the resistor body and the printed circuit board, when the standoffs are seated on the board. This allows for proper cleaning after the soldering process.

Our Applications Engineering Department is available to advise and to make recommendations for non standard technical requirements and special applications, please contact us.

</table>

Note: * 5.08 mm lead spacing available - specify CE-VSRJ.

### ORDERING INFORMATION

Specify Charcroft VSR Series resistors as follows:

<table>
<thead>
<tr>
<th>MODEL NO.</th>
<th>TERMINATION</th>
<th>RESISTANCE VALUE</th>
<th>TOLERANCE</th>
<th>TR</th>
</tr>
</thead>
<tbody>
<tr>
<td>CE-VSR</td>
<td>T = RoHS compliant</td>
<td>250R00</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CE-VSRJ</td>
<td>None = Tin/Lead alloy</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>CE-VSR4</td>
<td></td>
<td></td>
<td></td>
<td>Tape &amp; Reel</td>
</tr>
<tr>
<td>CE-VSR5</td>
<td></td>
<td></td>
<td></td>
<td>(CE-VSR &amp; CE-VSRJ only)</td>
</tr>
<tr>
<td>CE-VSR6</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
