ULTRA FAST RECOVERY
POWER RECTIFIER

SML05SC06D3A / SML05SC06D3B

- $V_{R\text{(max)}} = 600V$
- $I_{F\text{(avg)}} = 5A$
- $V_{F\text{(typ)}} = 1.5V$
- DLCC3 Hermetic Ceramic Surface Mount Package Designed as a Drop In Replacement for “D-5B”/“E-MELF” Package
- No Reverse Recovery
- No Forward Recovery
- High Reliability Screening Options Available

ABSOLUTE MAXIMUM RATINGS ($T_A = 25°C$ unless otherwise stated)

Notes:
(1) Pulse Width \(\leq 300\mu s\), \(\delta \leq 2\%\)
MECHANICAL DATA

The additional contact provides a connection to the lid in the application. Connecting the metal lid to a known electrical potential stops deep dielectric discharge in space applications; see the Space Weather link [www.semelab.co.uk/dlcc3.html](http://www.semelab.co.uk/dlcc3.html) on the Semelab web site. Package variant to be specified at order.

† The DLCC3 package design takes full advantage of the proven high reliability pedigree of the HTCC surface mount packaging technology, which is easily integrated for automated assembly. Semelab has taken the existing standards for ceramic surface mount package manufacture and added additional design features to enhance thermal performance, to present a competitive alternative for high reliability applications.

SOLDER PAD LAYOUT

Soldering temperature should be 260°C for a maximum of 10 seconds.

PACKAGE MASS

Gold Plated Solder Pad Finish = 150mg
SCREENING OPTIONS
Space Level (JQRS/ESA) and High Reliability options are available in accordance with the High Reliability and Screening Options Handbook, available for download from the TT electronics Semelab web site.

ESA Quality Level Products are based on the testing procedures specified in the generic ESCC 5000 and in the corresponding part detail specifications.

Semelab’s QR216 and QR217 processing specifications (JQRS), in conjunction with the companies ISO 9001:2000 approval present a viable alternative to the American MIL-PRF-19500 space level processing.

QR216 (Space Level Quality Conformance) is based on the quality conformance inspection requirements of MIL-PRF-19500 groups A (table V), B (table VIa), C (table VII) and also ESA / ESCC 5000 (chart F4) lot validation tests.

QR217 (Space Level Quality Conformance) is based on the screening requirements of MIL-PRF-19500 (table IV) and also ESA / ESCC 5000 (chart F3).

JQRS parts are processed to the device data sheet and screened to QR216 with conformance testing to Q217 groups A and B in accordance with MIL-STD-750 methods and procedures.

Additional conformance options are available, for example Pre-Cap Visual Inspection, Buy-Off Visit or Data Packs. These are chargeable and must be specified at the order stage (See Ordering Information). Minimum order quantities may apply.

Alternative or additional customer specific conformance or screening requirements would be considered. Contact Semelab sales with enquiries.

MARKING DETAILS
Parts can be laser marked with approximately 7 characters on two lines and always includes cathode identification. Typical marking would include part or specification number, week of seal or serial number subject to available space and legibility.

Customer specific marking requirements can be arranged at the time of order.

Example Marking:

05SC06A 001

ORDERING INFORMATION
Part numbers are built up from Type, Package Variant, and screening level. The part numbers are extended to include the additional options as shown below.

Type – See Electrical Stability Characteristics Table
Package Variant – See Mechanical Data
Screening Level – See Screening Options (ESA / JQRS)

Additional Options:

Customer Pre-Cap Visual Inspection | CVP
Customer Buy-Off visit | CBV
Data Pack | DA
Solderability Samples | SS
Scanning Electron Microscopy | SEM
Radiography (X-ray) | XRAY
Total Dose Radiation Test | RAD
MIL-PRF-19500 (QR217)
Group B charge | GRPB
Group B destructive mechanical samples | GBDM (12 pieces)
Group C charge | GRPC
Group C destructive mechanical samples | GCDE (12 pieces)
Group C destructive electrical samples | GCDM (6 pieces)
ESA/ESCC
Lot Validation Testing (subgroup 1) charge | LVT1
LVT1 destructive samples (environmental) | L1DE (15 pieces)
LVT1 destructive samples (mechanical) | L1DM (15 pieces)
Lot Validation Testing (subgroup 2) charge | LVT2
LVT2 endurance samples (electrical) | L2D (15 pieces)
Lot Validation Testing (subgroup 3) charge | LVT3
LVT3 destructive samples (mechanical) | L3D (5 pieces)

Additional Option Notes:
1) All ‘Additional Options’ are chargeable and must be specified at order stage.
2) When Group B, C or LVT is required, additional electrical and mechanical destructive samples must be ordered.
3) All destructive samples are marked the same as other production parts unless otherwise requested.

Example ordering information:
The following example is for the SML05SC06D3A part with package variant A, JQRS screening, additional Group C conformance testing and a Data pack.

Part Numbers:
SML05SC06D3A-JQRS (Include quantity for flight parts)
SML05SC06D3A-GRPC (chargeable conformance option)
SML05SC06D3A-GCDE (charge for destructive parts)
SML05SC06D3A-GCDM (charge for destructive parts)
SML05SC06D3A-DA (charge for Data pack)

Customers with any specific requirements (e.g. marking or screening) may be supplied with a similar alternative part number (there is maximum 20 character limit to part numbers). Contact Semelab sales with enquiries.
